Performance Summary

Flutter Developer with strong experience in building scalable, location-aware mobile applications. Hands-on expertise in **Google Maps integration, GIS-based systems, geofencing, and live location tracking**. Contributed **60–85%** to multiple production-grade Flutter applications across real estate, attendance management, and enterprise platforms, focusing on performance, reliability, and user experience.

Education

- **Chhattisgarh Swami Vivekanand Technical University** *2019 – 2023*
  Bachelor of Technology (Computer Science) CGPA: 8.14

Experience

- **Emilo Ventures Pvt Ltd** — Flutter Developer *Jun 2026 – Present*
  - Building **eMILO**, a live social networking app on Google Play, with Flutter.
  - Developing feed, stories, photo and video sharing, friends and **real-time chat** features.
- **Digikraft Social** — Mobile Application Developer *May 2024 – Jun 2026*
  - Contributed **70–85%** to Flutter development across Exam, Grocery, Attendance, LMS, and E-Commerce applications.
  - Implemented **Google Maps, GIS tracking, geofencing, and live location monitoring**.
  - Developed secure authentication, real-time dashboards, and payment-enabled workflows.
- **Fixing Dots** — Flutter Developer *Jun 2023 – May 2024*
  - Delivered **60–70%** of Flutter UI and business logic for a quotation management platform.
  - Built dashboards, quotation workflows, and role-based access modules using REST APIs.

Projects

- **GharKaSathi** — *Flutter | Real Estate & Home Services*
  - Led **70–80%** of Flutter development for property buy, sell, rent, and lease modules.
  - Integrated **Google Maps and GIS-based property visualization** with accurate location tagging.
  - Implemented **live partner tracking**, service-area mapping, and real-time service booking flows.
- **Attendance Management Application** — *Flutter | Location-Based System*
  - Developed **GIS-enabled attendance** using geofencing-based punch-in and punch-out.
  - Implemented **Google Maps integration and live employee location tracking**.
  - Built role-based access control with real-time attendance status updates.
- **FixQ (Quotation App)** — *Flutter + Laravel*
  - Contributed **40–50%** to frontend development and quotation workflows.
  - Integrated authentication, pricing logic, and approval pipelines via REST APIs.
- **BBK (School Management App)** — *Flutter + Laravel*
  - Delivered **30–35%** of Flutter UI including role-based access and permissions.
  - Implemented secure login and student management workflows.
- **Optum E-Commerce Platform** — *React Native CLI*
  - Contributed **30–40%** to UI development, cart management, and checkout flows.
  - Optimized mobile UX for international users (Russia & Uzbekistan).

Technical Skills

- **Languages:** Dart, C, C++, JavaScript
- **Mobile & Web Development:** Flutter, Riverpod, BLoC Pattern, GetX, Laravel, React Native CLI, Clean Architecture, MVVM, MVC
- **Location Technologies:** Google Maps SDK, GIS Concepts, Geofencing, Live Location Tracking
- **APIs & Tools:** REST APIs, Git, GitHub, Postman, Thunder Client
- **Concepts:** Role-Based Access Control, Real-Time Systems, Performance Optimization
